

From 3th to 7th March 2014 we took part In Exchange to Imperia, Italy. This trip was the last one we could participate in matter of project Comenius. To Imperia also came students from Germany, Portugal, Greece and Turkey who are involved in the project too. All together, we worked on project's tasks and visited characteristic places of this region.

Our trip started at the Gdańsk airport in the early hours of the morning. Our flight was without delay so after few hours we landed in Nice where Portuguese had been waiting for us. Then we went to Imperia by a minibus. During this ride we could see beautiful views and observe how Italian roads look like. When we arrived in Imperia we met our host families and spent the rest of the evening with them.

On the second day we were at IIS Ruffini school. Students showed us the school and told us about the region. Then we could be on the lessons so we compared the way of teaching in different countries. After school we went for lunch and then we were visiting the city. It was really amazing that we could see the sea and mountains in the same time. We were also amazed by Italian drivers who have to be very skilled to drive through so narrow streets. In the evening we went bowling which helped us to know each other.

Next day we went to Genoa and we were very surprised that we got caught in a traffic jam. Finally we reached to the city and started sightseeing. We saw San Lorenzo Cathedral, Historical city centre and visited the aquarium. After a fantastic day we returned to Imperia.

The following day we were at school again. After one lesson we went to Town Hall where we met with the major of the city. We had a nice talk with him and then we visited the Museo dell'Olivo. We could try different kind of olive oil, olives, jam or pesto there. It was a traditional taste of Italy. In the afternoon we went to Sanremo where we had time for lying on the beach and buying souvenirs.

The last day was the day of saying goodbye. Of course most of us were crying. After that we had a lot of free time so we decided to see Imperia for the last time. Walking through these incredible streets, admiring beautiful views and sunbathing on the beach are what i will remember for long time. But all good things come to the end so we had to come back to Poland.

In my opinion exchanges are the best way to see traditional life in different countries. This kind of trips enable us to improve our language skills and make new friends. If I had a chance of taking part in such enterprise again, I would do everything to make it possible.
